Nutritional value

Quinoa has a high oil content (6% compared to 2% in cereals), and a high content of poly-unsaturated fatty acids (omegas). It has a high protein content (14-18%), including a high lysine- and methione

content (double of cereals). Quinoa has also a high iron content, 50% more than in cereals, and higher than any other crop. Vikinga can be consumed as whole grain, or integral, and therefore it contains dietary fibers.

USES

Quinoa has many uses, either as simple products like grains, flour and flakes, but also delicious foods like salads, müsli, burgers, torrijas, cakes, porridge to go, and other things.

Focus is always taste, functionality and nutrition.
